

Course: CSC-465

Professor: Dr. Eli T. Brown

Team: PMAD

Project: Visualizing **Divvy** Dataset

Scope: 2016 Dataset of Q1 & Q2

Topics Experimented:

1. Word Cloud
2. 2-D Visualizations
3. Hierarchy Plot
4. Geospatial VIZ – Choropleth
5. Heat Map
6. Neural Network Map

Riding behaviour of Customers and Subscribers

Number of trips according to age

### Male and Female Ride Habits

## DP Capacity in Chicago

### Docking Capacity

<http://via.library.depaul.edu/mom/20/>

## Per Capita Income Vs Number of Stations

### Busiest Time of the day and Busiest time of the Six Months

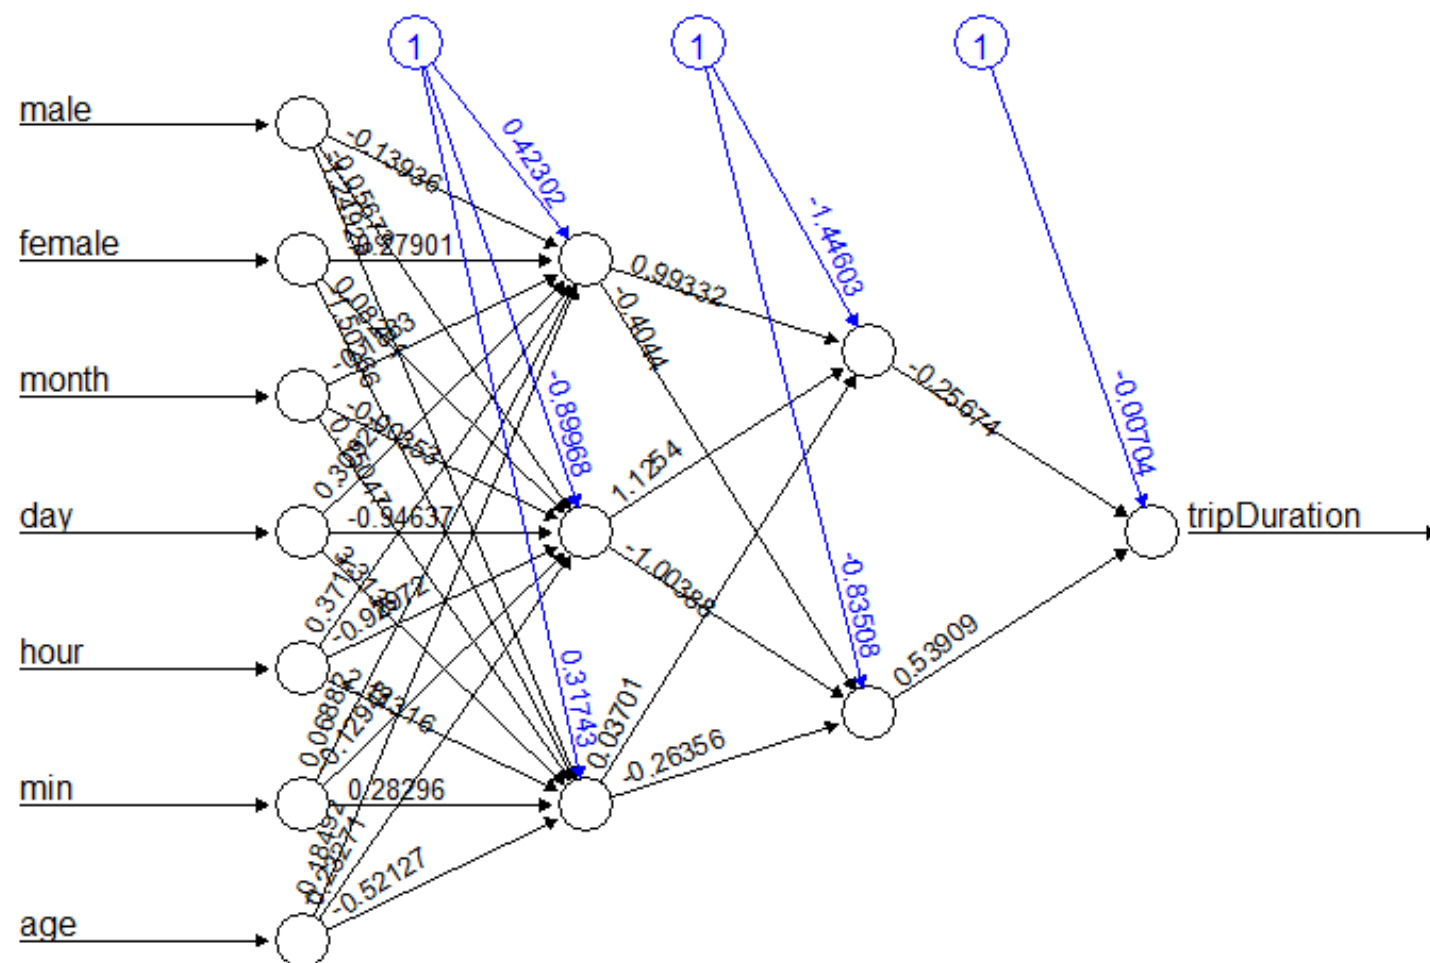

Number of Records

Events Heat Map

Neural Network Plot for finding Trip Duration

Error: 111.16569 Steps: 3972
